

# Log Washer

## Extended Die Life

Improving the quality of logs for a superior extrusion begins with **GRANCO CLARK's** Log Washer. As logs pass through, they receive a high-pressure, 3000 psi water spray that removes contaminants. By doing this, it extends the life of your die and container, reducing maintenance.

The **GRANCO CLARK** Log Washer is constructed of stainless steel, with sealed bearings, brushes on ends for water containment (*no aluminum dust explosion hazard and no brush replacement*). No electronics or electrical devices near the spray makes this log washer superior to any other log washer on the market. (*It has a simple, sleek design and can be added to an existing line with minimal effort*).

### Improving the Quality:

- High pressure spray removes surface contaminants
- Less Die Repair

### Durability:

- Stainless Steel Construction
- Sealed Bearings
