

SERVICE BULLETIN

PROBE ROD SIZE CHANGE

ATTENTION!

Dear Valued Customer,
Due to the availability of material, Granco Clark is switching from 1/4" probe rods to 3/16" probe rods. Upon your first purchase you will need to buy a new assembly which includes rods, springs, set collars and the UHMW retainer. After this first purchase you will be able to purchase just the probe rods as you had before. Please reference the flow chart below when ordering probe rods.
